## Jim Miller, Chairman and CEO of ImageWare Systems Talks About Fujitsu

Posted: Feb 12, 2018 8:05 AM EST Feb 12, 2018 8:05 AM EST

*"In The Boardroom" on SecuritySolutionsWatch.com*

ImageWare Systems, Inc. (OTCQB:IWSY)

NEW YORK, NY, UNITED STATES, February 12, 2018 /[EINPresswire.com](#)/ -- Jim Miller, Chairman and CEO of ImageWare Systems joined us "In The Boardroom" to discuss recent developments. For the entire interview, please click here:

[http://securitysolutionswatch.com/Interviews/in\\_Boardroom\\_ImageWare.html](http://securitysolutionswatch.com/Interviews/in_Boardroom_ImageWare.html)

On January 31, 2018, Fujitsu issued this Press Release which included a discussion of the ImageWare agreement...

<<Fujitsu Extends Global Biometrics-as-a-Service Platform to Australia

<http://www.fujitsu.com/au/about/resources/news/press-releases/2018/fujitsu-extends-global-biometrics-as-a-service-platform-to.html>

News facts:

New service makes it easy for organisations to deploy and manage centralised biometric authentication

Fujitsu's biometric security solutions portfolio supports multimodal biometric authentication through mobile devices

Fujitsu signs agreement to partner with ImageWare Systems (OTCQB:IWSY) following collaboration in Europe and North America.

Fujitsu today announces the availability of its cloud-based, multimodal Biometrics as a Service platform in Australia. The unique solution, which allows organisations to conveniently deploy biometric authentication for protection against increasingly complex security risks, is the result of Fujitsu's partnership with ImageWare Systems (1) .

The Fujitsu multimodal Biometrics-as-a-Service offering enables fast deployment of biometric authentication via a range of methods depending on an organisation's unique security requirements. Organisations can easily deploy authentication using voice, face, and palm printing images on customers' smartphones with a low cost, and low risk.

Multimodal biometric systems are best suited to applications where high accuracy and security is required because they need two biometric credentials for positive identification instead of one in a unimodal system. A multimodal biometric also gives the user a choice of their preferred biometric for their convenience.

As enterprises continually seek and adopt faster, more efficient business approaches, security becomes even more critical. When working in multi-device and location-independent environments, secure centralised authentication is becoming essential for conducting everyday business transactions. Fujitsu's Biometrics-as-a-Service offering fulfils this need across enterprise environments as well as mobile devices such as smartphones, tablets and notebooks.

Multimodal Biometrics-as-a-Service is a massively scalable, globally available solution that can quickly assist organisations with determining a true identity in the first instance via identification or verifying against a known entity. By leveraging a centralised architecture, the solution allows new biometric information to be checked against an organisation's existing biometrics databases to reduce fraud, something that is not possible with match-on-device solutions like the type found in smartphones. Organisations leveraging Single Sign On (SSO) and remote access solutions can now easily enhance security for all users with this flexible multi-factor authentication service.

**We are honored to have Jim Miller join us "In The Boardroom" at this time to discuss the many exciting recent developments at ImageWare with partners such as Fujitsu."**

— *Martin Eli, Publisher*

"For Australian enterprises, protecting data and implementing access control is more important than ever. Through this agreement with ImageWare Systems, our customers gain access to an enhanced portfolio of biometric security solutions that reduce the barriers to deploying highly secure biometric authentication. Delivering biometric authentication

as a service opens up many new use cases and reduces the complexity usually associated with security measures," said Mike Foster, Chief Executive Officer, Fujitsu Australia and New Zealand.

Jim Miller, Chairman and CEO of ImageWare Systems, adds: "Biometrics are not only the most secure form of authentication, but are also the easiest to use as each user is his or her own password. By taking advantage of our powerful biometrics solutions delivered via Fujitsu's cloud-based security as a service, many more businesses can easily enhance their security. This agreement further extends our marketing and sales activities with Fujitsu to new regions en route to a truly global offering. Fujitsu's global capability extends the reach of ImageWare's patented, multimodal biometric technology as a core element of Fujitsu's cyber security portfolio across the globe."

Notes:

(1) About ImageWare Systems, Inc. ImageWare Systems, Inc (OTCQB:IWSY) is a leading developer of mobile and cloud-based identity management solutions, providing patented biometric authentication solutions for the enterprise. The company delivers next-generation biometrics as an interactive and scalable cloud-based solution. ImageWare brings together cloud and mobile technology to offer multi-factor authentication for smartphone users, for the enterprise, and across industries. ImageWare's products support multi-modal biometric authentication including, but not limited to, face, voice, fingerprint, iris, palm, and more. All the biometrics can be combined with or used as replacements for authentication and access control tools, including tokens, digital certificates, passwords, and PINS, to provide the ultimate level of assurance, accountability, and ease of use for corporate networks, web applications, mobile devices, and PC desktop environments. ImageWare is headquartered in San Diego, California, with offices in Portland, Oregon, Ottawa, Ontario, and Mexico City, Mexico.

About SecuritySolutionsWatch.com

-----  
[www.SecuritySolutionsWatch.com](http://www.SecuritySolutionsWatch.com) features thought leadership, content marketing, interviews about IT, IoT and security solutions. Our flagship "In The Boardroom" program, now in its 15th year, has delivered outstanding content about solutions from leading global brands such as: 3M, ASSA ABLOY, Cisco Security, Dell EMC, HP Cybersecurity, Fujitsu, Gemalto, HID Global, IBM, ImageWare, Intel, SAP, Siemens Security, Stanley Security, SONY Security, Unisys, and Yahoo, just to name a few.

What's YOUR cybersecurity, physical security, mobility, payments, safety "smart" or blockchain solution?

We invite you to please join us "In The Boardroom" at [www.SecuritySolutionsWatch.com](http://www.SecuritySolutionsWatch.com).

For a quick tour to see exactly how your brand will be featured, please contact Ali Eng on our publishing team via email: [ALE@SecuritySolutionsWatch.com](mailto:ALE@SecuritySolutionsWatch.com), or phone: 1+914.690.9351 .
