NEW YORK, NY, UNITED STATES, February 20, 2018 /[EINPresswire.com](#)/ -- Jim Miller, Chairman and CEO of ImageWare Systems joined us "In The Boardroom" to discuss recent developments.

For the entire interview, please click here: http://securitysolutionswatch.com/Interviews/in_Boardroom_ImageWare.html

On February 15, 2018, ImageWare Systems released the following news:
<https://www.iwsinc.com/2018/02/15/lifemed-id-enters-partner-agreement-with-imageware-systems/>

LifeMed ID Integrates Imagewares Patented Multi-Modal Biometric Authentication Software into its Patient Authentication Software Solution for Healthcare

LifeMed ID, a wholly owned subsidiary of OrangeHook, Inc., (OTCIQ: ORHK) announced the company has entered into a partnership agreement with ImageWare Systems, Inc. (OTCQB:IWSY.) The new partnership combines LifeMed IDs Authoritative Identity Management Exchange (AIMe™), a comprehensive solution that eliminates many root causes of patient misidentification, with ImageWares powerful multi-modal biometric authentication platform GoVerifyID.

Our partnership with ImageWare combines our proven methods of patient identity proofing with multi-modal biometrics to streamline patient authentication. As a result, we can eliminate manual processes that are the source of serious errors and continued creation of duplicate medical records, said Rick Resnick, Co-CEO at LifeMed ID. Our token agnostic approach offers customers full flexibility to address the wide variety of existing workflows across the care continuum and allows them to evolve over time with everchanging technology. Healthcare organizations can now have the means to assure that every patient will have one identity permanently linked to the correct medical record across all points of care.

Healthcare organizations will be able to provide care with confidence knowing that they have the right medical record for each patient, said Jim Miller, CEO at ImageWare Systems. The healthcare enterprise will be enabled to operate more efficiently and the risk of medical identity fraud is drastically reduced using biometric authentication. The combination of AIMe and GoVerifyIDs biometric platform is a powerful combination that will help further assure that the correct health record is being tied to the right patient.

About LifeMed ID

LifeMed ID enables accurate patient identification by providing Authoritative Identity Management Exchange (AIMe), a patent pending comprehensive ID platform. AIMe provides confirmation that patients are accurately known as they travel throughout the various stages of care, allowing facilities to confidently welcome patients and successfully manage their identities. Patients simply present their ID which is already linked to their unique records at check-in. This process provided by AIMe allows physicians to reference the right information for treatment. For more information, visit <http://www.lifemedid.com>.

“
Thank you Jim Miller

About ImageWare Systems, Inc.
ImageWare Systems stands out as a leader in cutting-edge, identity management solutions driven by biometric technology. We deliver next-gen biometrics as an interactive and scalable cloud-based solution. We

for joining us "In The Boardroom" to discuss the Agreement With LifeMed ID and other exciting developments at ImageWare with partners such as Fujitsu, HPE, IBM, Microsoft & SAP."
