AMAG Technology Announces New Version of Symmetry Access Control

Symmetry™ Access Control enhancements enable users to better control who has access to what and when, with key employee exceptions and bulk changes. Symmetry M4000 Access Control with Symmetry® CompleteView™ Video Management System (VMS) providing increased information about alarms and additional situational awareness.

The improvement that makes this version different from previous versions is the ability to create a bulk change to a cardholder. Simply create one change and then push that change across multiple cardholders at once.

The Symmetry M4000 version of Symmetry Access Control provides businesses with an easier way to update and control their access control systems. By allowing users to make changes to multiple cardholders at once, businesses can save time and effort when making system updates. Additionally, the Symmetry M4000 version of Symmetry Access Control provides businesses with the flexibility to make changes to their access control systems without disrupting daily operations.

AMAG Technology, an Allied Universal Company, is a world leader in unified security solutions that help organizations mitigate risk, ensure compliance and reduce the overall cost of security. Symmetry Access Control is just one of the many products that AMAG Technology offers to help businesses improve their security.
